

Livingdesire - Task for React Developer Intern Role

You have to create a simple e-commerce website landing page (Homepage) using ReactJS.

1. The home page should have a search bar, the cart button, the wishlist button and a login/signup button.
2. The page should have a sub-header containing the types of products. (Bean Bag, T-Shirt, Curtains, Shirt, Saree, Trousers, Hoodies)
3. The home page should have a list of random products (4 in a row) having image, name, price, discount price, wishlist button, and add to cart button.
4. There should be a minimum of 20 products.
5. The page should have a footer with links: 'About Us', 'Cancellation and Return Policy', 'Privacy Policy', 'Terms and Conditions'.

Once you complete the task, the performance would be judged on the basis of the knowledge of React and how you have used it in this task.

The deadline for this task is 9th April 2021, 6 PM. The code is not needed. Screenshots of the page or hosted link would be fine.

Currently, Livingdesire website is in development mode. You can refer to this link:
